# **Hill Administrative Services**

PC Technician

Omaha, NE September 2020 – January 2021

## TECHNICAL SKILLS

- Create curriculum and implement lesson plans, teach, troubleshoot, and contribute to other prospective developers' code, instruct rigorous courses while ensuring student comprehension of the material, introduce students to different areas of IT including Design, Infrastructure, Web/Software Development, Operations and Data.
- Experience using help desk, remote desktop software and 30+ 3<sup>rd</sup> party native and web applications. Troubleshoot third-party software and act as a liaison for any technical concerns with third-party applications, collaborate with third parties on major updates, contracts, or otherwise billable expenditure.
- Experience troubleshooting multi-function printers, phone systems, EDI code, SQL reporting errors, VPN configuration, internet connectivity, desktop/laptops/cell phones/printers/phone systems (hardware, software, firmware), phone switchboards, basic server administration, distribution groups, and basic cybersecurity.

## LEADERSHIP AND PROJECT MANAGEMENT

- 5 years of experience planning open and closed events (outreach, trainings, social events, etc.), community engagements, maintaining schedules, ensure project deadlines, public speaking to target audiences (of up to 600 individuals), and create advertisements for events.
- Plan recruiting outreach events, ensure quality services rendered to clients outlined in program grant, ensure PPI data security for students, file compliance reports with funders.
- Experience with cash management, safe management, bank deposits, supply ordering, scheduling, inventory management, project management, store management, opening new locations, work with/supervise 3<sup>rd</sup> parties to complete projects.

# **PROJECTS**

## **Foundations Plus**

Created the curriculum for the Foundations Plus class at AIM
 Institute. This class was geared to build individuals with little to
 no technical skill to become entry-level front-end web developers
 in a 100-hour course.

# **Large Scale Imaging**

 Part of a team that was tasked with prepping the deployment of new PCs and other workstation hardware and imaging it to be ready for grand opening of new hospital building.

# **Large Scale Updates**

 Perform large scale updates as multi-phase projects to KACE Help Desk, Symantec Endpoint Security, Microsoft Office, Exchange, and imaging company hardware as needed.
