Omaha, NE   *September 2020 – January 2021*

TECHNICAL SKILLS

- Create custom applications and themes for websites in WordPress using HTML/CSS, JavaScript, jQuery and some PHP. Utilize, install, monitor and update Advanced Custom Fields, Gutenberg block editor, and over a dozen other WordPress plugins.

- Create curriculum and implement lesson plans, teach, troubleshoot, and contribute to other prospective developers' code, instruct rigorous courses while ensuring student comprehension of the material, introduce students to different areas of IT including Design, Infrastructure, Web/Software Development, Operations and Data.

- Experience troubleshooting multi-function printers, phone systems, EDI code, SQL reporting errors, VPN configuration, internet connectivity, desktop/laptops/cell phones/printers/phone systems (hardware, software, firmware), phone switchboards, basic server administration, distribution groups, and basic cybersecurity.

LEADERSHIP AND PROJECT MANAGEMENT

- 5 years of experience planning open and closed events (outreach, trainings, social events, etc.), community engagements, maintaining schedules, ensure project deadlines, public speaking to target audiences (of up to 600 individuals), create advertisements for events

- Ensure quality services rendered to clients outlined in program grant, ensure personal private information data security for students, file compliance reports with funders.

PROJECTS

Playgrounds Website Creation

- Created the front-end code for this entire project according to the designs provided by our UX/UI Designer. Ensure best SEO and ADA practices were followed for broad accessibility and outreach.

Corporate Website Overhaul

- Create design theme and layout for header, footer, and several pages and code it on front and back end, add visual effects, and ensure ADA compliance throughout the site.

Clone and modify Kearney Site

- Clone Kearney, NE location website based off an existing branch.

- Review content and replace all instances of information pertaining to existing location to reflect Kearney. Ensure accuracy of all cloned and modified information.

Foundations Plus

- Created the curriculum for the Foundations Plus class at AIM Institute. This class was geared to build individuals with little to no technical skill to become entry-level front-end web developers in a 100-hour course.
